

ALBARA FAHED ALHARISSY

JUNIOR C#/.NET BACKEND DEVELOPER

GitHub: github.com/Albarafahed | LinkedIn: [linkedin.com/in/albara-csharp-developer/](https://www.linkedin.com/in/albara-csharp-developer/)

Profile

4th-year Information Technology student and Junior C#/.NET Backend Developer focused on building reliable and maintainable software solutions. Hands-on experience includes desktop systems, SQL Server databases, layered architecture, ADO.NET, and SOLID-oriented engineering practices; currently deepening backend expertise with ASP.NET Core and Entity Framework Core.

Technical Skills

Backend	C#, .NET, ASP.NET Core, Web API, Entity Framework Core, LINQ, REST APIs
Database	SQL Server, T-SQL, Database Design
Engineering	OOP, SOLID, Clean Architecture, 3-Tier, N-Tier
Tools	Git, GitHub, Visual Studio, Postman

Selected Projects

DVLD System	C# WinForms, SQL Server, 3-Tier Architecture, and ADO.NET. Drivers, license, testing workflow, and user management.
Real Estate Management System	C# WinForms, SQL Server, ADO.NET, and N-Tier Architecture for clients, properties, contracts, payments, and reports.
Clinic Management System	C# and SQL Server desktop system for patients, doctors, appointments, and medical operations.
Contacts Management	Layered C# application with SQL Server, CRUD operations, country management, image paths, and DataGridView binding.

Additional Project Work

C++ problem-solving, console, and data-structure repositories; SQL Server database design and 54+ SQL challenges; Flutter UI, game, and application projects; PHP/MySQL web applications; and Python projects including Medical Center and Academic Advisor AI.
